

# GOMA is **Community DeFi[ned]**.

Litepaper Document v1.1 by GOMOD, codexem

## ABSTRACT

The GOMA Ecosystem functions as a DAO (Decentralized Autonomous Organization) and comprises of a combination of decentralized functions and features designed to enable opportunities for the general public to participate and receive cryptographic, or blockchain enabled, earnings or rewards; as well as be empowered to be a part of a democratized consensus driven environment without borders or external governance.

The ecosystem is made up of two primary tokens, GOMA and GOMAx. These two tokens perform a core symbiotic feature of stabilizing GOMA's market, and enablement of community incentivization through reflection while simultaneously establishing a healthy demand for the primary GOMA ecosystem token (\$GOMA).

This Litepaper aims to educate readers on our vision, strategy and roadmap. Below we illustrate the unique relationship between our ecosystem tokens, and expand on our goals for the upcoming months. We are happy to be the pioneers of a new approach to driving value and velocity within a tokenized ecosystem, and being fortunate enough to empower a strong GOMA community along the way.

## **Table of Contents:**

### **1. The GOMA Finance Ecosystem [4]**

- GOMA in a nutshell
- GOMA (The Ecosystem Token)
- GOMA Fi Platform
- GOMAx (Ecosystem Value Stabilizer And 'Ratio'-based Reflection Token)

### **2. GOMA [5]**

- What is GOMA?
- GOMA Token Specifics

### **3. GOMAx [6]**

### **4. GOMA Ecosystem of Value (EoV) DeFi[ned] [8]**

### **5. Roadmap [9]**

## GOMA IN A NUTSHELL

# The GOMA Finance Ecosystem

*GOMA started out with one goal in mind, to establish itself as an industry leader in building both utility focused technology and utility focused communities who are seeking opportunities to maximize their financial wellbeing.*

GOMA Finance is a community-focused DeFi ecosystem focused on providing innovative NEXTGEN financial instruments to the GOMA Community.

### **GOMA.FI**

Our GOMA.FI platform and dashboard provide important ecosystem insights, ecosystem reward metrics and DeFi/Digital asset tools to empower our community to grow their wealth. This is the access point to the utility of our two ecosystem Utility tokens - \$GOMA (PRIMARY) and \$GOMAx (VALUE STABILIZER AND INCENTIVE TOKEN)

### **GOMA (The Primary Ecosystem Token)**

\$GOMA token is a Hyper-Deflationary DeFi token used for staking, yield farming, reflection, and NFTs. The GOMA token is also used for governance throughout the GOMA Finance ecosystem, and gaining consensus for future network progress.

### **GOMAx (Ecosystem Value Stabilizer And 'Ratio'-based Reflection Token)**

GOMAx plays a significant role in enabling value stabilization in the ecosystem, as well as driving the demand for the primary ecosystem token (GOMA); GOMAx also provides a percentage of reflection, in BNB (Binance Coin), to all holders based on their holding ratio between GOMA and GOMAx.

### **888 (CONCEPTUAL: GOMA Disposable Ticket Token)**

*The 888 disposable ticket token grants spot access to key GOMA ecosystem DeFi opportunities; such as lucky draws, raffles, lottery, etc.*

## THE PRIMARY ECOSYSTEM TOKEN

# GOMA

As an ecosystem token GOMA is responsible for the key performance indicators and price impact of the entire GOMA economy. Essentially the utility focus and community engagement with the GOMA ecosystem hinges on the success of GOMA.

### What is GOMA?

GOMA is a hyper-deflationary / rapid-burning community token, with built-in token burning and holder redistribution; with a key focus on DeFi (Decentralized Finance).

It is built using BEP20/ERC20 standard on Binance Smart Chain (BSC) - for low transaction costs and high transaction throughput - and is designed to power the DeFi and Digital asset mechanisms behind the GOMA.Fi platform.

**GOMA token specifics:** (for updated details go to <https://GOMA.fi>)

**CURRENT Total Supply:** 314,000,000,000,000 GOMA

**Minimum Total Supply:** 50,000,000,000 GOMA

**Burn[1] rate:** 3% of every transfer/trade

**Redistribution[2]:** 3% of every transfer/trade

**Charity[3]:** 1% of every transfer/trade

**LP[3]:** 1% of every transfer/trade

**[1] BURN:** The burn rate is the percentage of tokens burned on every transfer, buy or sell.

**[2] REDISTRIBUTION:** The redistribution rate is the percentage of tokens redistributed or shared with all other holders on every transfer, buy or sell. This is a concept that was popularized by Safemoon. The mechanism incentivizes token holders to hold in order to earn dividends from the transactions (buys and sells). Redistribution is based on percentage (in the contract), current token balance and number of holders.TL; DR: You receive more tokens automatically by other people taking action.

**[3] CHARITY:** 1% of every transfer, buy or sell, is sent to a charity wallet to be distributed at a later date.

**[4] LP:** 1% of every transfer, buy or sell, is sent to liquidity.

GOMA ECOSYSTEM DOCUMENTATION - This document is a working paper, in progress, and may be edited or amended without notice.

## KEEPING AN ECOSYSTEM WHOLE IS THE WORK OF 2 (tokens)

# GOMAx

GOMAx is our ecosystem value stabilizer & reflection token incentivizing the network to hold GOMA; & powers secondary market demand for GOMA.

### What does it do?

GOMAx redistributes, or reflects, BNB (Binance Coin) back to its holders based on their current token holdings ratio of **GOMA:to:GOMAx**, and the current reflection pool size [*refer to BNB Reflection or Redistribution*].

### How does it work?

GOMAx acts as a level of certification of eligibility, deeming you eligible to receive a percentage of BNB from the reflection pool. However, in the GOMA Ecosystem, you are required to hold GOMA tokens as an access key to unlock those earnings; and you can increase them based on your GOMA holdings.

The more GOMAx you hold the higher your percentage yield will be, as long as you have comparable GOMA in the same wallet.

**Example (hypothetical):** if you hold 1,000 GOMAx, you are eligible for 10% reflection in BNB, but will receive zero reflection if you hold zero GOMA. If you hold 1,000,000,000 GOMA and 1,000 GOMAx, you will receive the 10% of the available BNB reflection pool back into your wallet on every transaction.

The more GOMA you hold the more you will get back from the amount of GOMAx that you have. In the end, holding and continuing to buy GOMA will provide passive income through GOMAx.

The GOMAx token contract employs a static rewards system—15% of every transaction is split in two:

- 10% BNB is redistributed to the reflection pool
- 5% is used to fuel the liquidity pool exchange growth, and key management

GOMA ECOSYSTEM DOCUMENTATION - *This document is a working paper, in progress, and may be edited or amended without notice.*

### ***BNB reflection or redistribution***

*Popularized by HODL and GhostFace, a transaction fee is applied to every single buy /sell order, tokens are then swapped in realtime for BNB and added to a POOL (similar to how liquidity pools work). Holders can then go to a website and manually claim the BNB earned at specific time (daily / weekly / etc..). The BNB they can collect are based on their token holdings % and the current pool size. TL;DR: You hold, then go to the website and request your BNBs*

### **How do you buy and sell GOMAx?**

In order to continue to build and grow our ecosystem, for the short-term, the only currency that can be used to purchase GOMAx is the primary ecosystem token, GOMA.

- 1) Buy GOMA from an exchange - example Pancakeswap OR use the GOMA that you already have...
- 2) Go to GOMA.Fi, and SWAP GOMA for GOMAx
- 3) Our platform will do the rest and adjust percentages according to the ratio between GOMA and GOMAx to provide you with your BNB reflection eligibility.

**FURTHER DETAILS ABOUT GOMAx WILL BE  
PRODUCED OVER THE COMING DAYS, PLEASE  
CONTINUE TO REVIEW OUR PROGRESS.**

# GOMA Ecosystem of Value DeFi[ned]

The GOMA ecosystem of Value is built around the tools and mechanisms that make DeFi (Decentralized Finance) and Non-fungible Tokens (NFTs) instruments accessible to the masses. At our core we are technical experts who understand the value that decentralized financial instruments bring to the world, but at heart we are community-first.

Many people believe that DeFi is complicated, always extremely high risk, and not community orientated. At GOMA, we believe that we have re**DeFi**ned DeFi and designed it for the community. Community-first DeFi means simple tools, low-risk opportunities, and high-yielding instruments/options. That is what GOMA stands for.

## What can we expect to be included in GOMA's EoV?

We are working hard to innovate in an industry that innovates quicker than any other industry on the planet. Our offerings will adjust, change and evolve as the industry does.

### Planned Short-Term Goals:

- ❖ **Staking** *(already on round 2)*
- ❖ **Yield Farming**
- ❖ **Reflection**
- ❖ **Gaming**
- ❖ **NFTs** *(Non-fungible Tokens)*

# ROADMAP

\$GOMA

What we have done and...  
**Where We Are Going**

Q2 2021

- ✓ GOMA Launched
- ✓ Launched v1 GomaToken.com
- ✓ Initial Team
- ✓ Launched Initial Marketing
- ✓ Successfully Reached HardCap

July 2021

- ✓ Listed on Pancakeswap
- ✓ Listed on CoinGecko & CoinMarketCap
- ✓ Team growth, Expanded Regions
- ✓ Initial Partnerships (Torii Finance (DeFi), STEM (NFTs), Agareum (Gaming)...)
- ✓ Launched GOMA.fi v0.8
- ✓ Staking Snapshot

August 2021

- ✓ Initial Staking with Torii Finance (76% Round 1 yield, 3000%+ APY)
- ✓ Marketing in new Regions(Asia focus)
- ✓ Launch GOMA.fi v1 - With GOMA Staking
- ✓ Final Designs of GOMA GENESIS NFTs
- ✓ NFT Drop to GOMA Holders
- ✓ Launch of \$GOMA-In-GAME with AGAREUM
- ✓ Launch of GOMAx

September 2021

- ✓ GOMA listed on first CEX
- ✓ GOMA Holder NFT Marketplace
- ✓ Launch of 2 new GOMA.fi Staking Partners
- ✓ Second NFT Drop to GOMA Holders
- ✓ Launch of GOMA-In-GAME NFTS with AGAREUM

● Staking has begun!

HOLD, STAKE, **EARN**
